

CONNECTIVITY TEST MANUAL

FOR HOME OFFICE

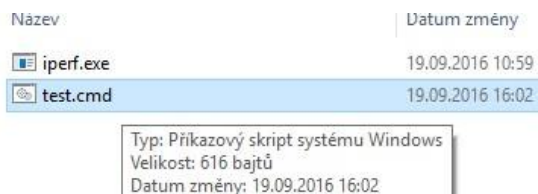

- 1) Download the file called connectivity_test from the site <https://www.comdataczech.cz/test-konektivity/> to your computer. Then click on the file with right mouse button and click on the „Extract all“.

- 2) At the following window you can choose where you want to extract the folder, choose „desktop“ and click on „extract“.

- 3) When the extraction is done go on „desktop“ or whenever you extracted the folder and run test.cmd.
- 4) **If the folder is password protected use password : heslo**

- 5) Test runs in black window like this one. It can take up to two minutes. You will see if the test is done in the black window. You can close it by pressing any key.

```
C:\WINDOWS\system32\cmd.exe
Spoustim test...
Ping...
OK
UDP Upload 128k
OK
UDP Upload 256k
OK
UDP Upload 384k
OK
TCP Download
OK
Test dokoncen
Soubor result.txt prosim zaslete na email it_cz_all@comdatagroup.com
Press any key to continue . . .
```

- 6) After the test is finished, the new file called result.txt will be created in the folder you choose for extraction (desktop in our case). Send the file „result.txt” as a file attachment by email to it_cz_all@comdatagroup.com as subject of the email type : Home office connectivity test, your name and location of the branch where you signed the contract.

Název	Datum změny	Typ
iperf.exe	19.09.2016 10:59	Aplikace
result.txt	20.09.2016 12:32	Textový
test.cmd	19.09.2016 16:02	Příkazov

Thank you for your cooperation
